Canon CanonIDBundle2 ID Camera Description

This special bundle includes:

inPhoto TWAIN driver and ID software with face finding capabilities
Canon EOS Rebel T6 digital ID camera

inPhoto TWAIN w/Face Finder Overview

Are you tired of the multi-step process currently required to place captured images in your photo ID software template? We are too! Transform a Canon digital camera into powerful photo ID equipment with inPhoto ID software.

inPhoto TWAIN driver and ID software with face finding capabilities
Canon EOS Rebel T6 digital ID camera

inPhoto TWAIN w/Face Finder Overview

Are you tired of the multi-step process currently required to place captured images in your photo ID software template? We are too! Transform a Canon digital camera into powerful photo ID equipment with inPhoto ID software.

inPhoto ID software can work as TWAIN driver with TWAIN-compatible [Asure ID software](#) developed by HID Identity (formerly Synercard). Just connect your Canon camera to the computer, install inPhoto ID software and enjoy working with your Canon digital camera from within Asure ID card design and management software.

Our inPhoto ID software is designed for automatic ID photography. inPhoto ID software is developed on the basis of inPhoto Capture software (Canon camera control), and includes all its abilities, plus some important features for automatic face recognition/crop and image enhancement.

inPhoto ID software basic features include:

- Ability to work as a TWAIN driver
- Ability to work as a standalone software
- Camera settings controlled from your computer:
- Focus (optical and digital zoom)
- Exposure (aperture, shutter, exposure compensation)
- Mode (sensitivity, white balance mode, flash mode)
- Live image preview - dynamic mode with 320 x 240 pixel resolution
- Automatic image rotation (depending on the camera orientation) and manual rotation by 90 and 180 degrees
- Save images to a specified folder
- Save and load user profiles
- Face recognition on the live image in the preview window
- Face crop on the captured image and cropped image enhancement
- Image export to the ID card design and management software

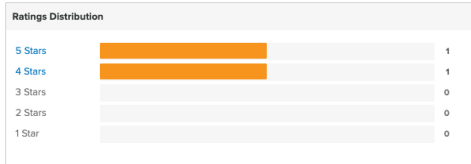

For installation and use of inPhoto ID software with TWAIN driver and face finding capabilities, users must be running Microsoft Windows 98, ME, 2000, XP or Windows 7.

Canon EOS Rebel T6 Overview

The EOS Rebel T6 is ideal for novice users or those new to digital SLR photography who are looking to capture crisp, professional-looking pictures. Quickly learn your way around the camera with the built in Field Guide and view live shooting on the huge 3.0-inch LCD screen. Featuring an 18.0 Megapixel CMOS (Complementary Metal Oxide Semiconductor) for high-resolution images, Canon's DIGIC 4 Image Processor to easily produce HD videos, and Scene Intelligent Auto mode that combines multiple shooting options to analyze an image, accounting for faces, moving objects, contrast, brightness, colors, and whether the camera is on a tripod or handheld to help you easily capture the perfect image.

★★★★★ Great Camera

We use this with our badge system and in combination with the Twain software, the images are perfect especially compared to those taken with a webcam.

★★★★★ Quality camera

I would recommend this camera not only for creating ID badge photos but for personal use as well.
