Datcard CD810 System Details

The CD810 Dual-Sided System is designed with everything you'll need for your ID card issuance program. The system is built around the ID Zone recommended CD810 dual-sided printer. Designed for high-volume and high-resolution printing, the CD810 uses TrueMatch™ print technology to print professional-looking ID badges. The compact-sized printer has both Ethernet and USB connectivity. The CD810 comes standard with no encoding, but can be upgraded to offer your choice of magnetic stripe encoding, contact/contactless smart card encoding, or both if needed. Plus, the printer is covered by a three-year loaner coverage plan provided by ID Zone to last the entire duration of the manufacturer's printer warranty.

The CD810 dual-sided system also includes a free 30-day subscription to CloudBadging ID Card Software, a 2.0 Megapixel Credential Cam camera for capturing ID photos in-house, one full-color YMCKT ribbon, and 500 blank PVC cards.

CD810 Dual-Sided Printer

- **Professional image quality**
  With a 300 x 1200 dpi (dots per inch) resolution, be confident that your printer can handle very detailed and intricate designs including 6-point font, 2D barcodes, complex two-byte character sets, and life-like images.

- **User-friendly printing**
  Quickly print cards with the soft-touch LCD control panel and ultra useful icons that guide you through the entire printing process. The 100-card input and separate 25-card output hoppers will keep your ID card program running smoothly and efficiently. To keep your printer in peak condition, your dual-sided CD810 ID system also includes a cleaning pen and cleaning roller.

- **Flexible connectivity**
  The Datacard CD810 printer comes standard with both Ethernet and USB connectivity, as well as a browser-based printer manager. These features make it easy for you to integrate the CD810 into just about any IT environment or application.

- **Robust performance and impressive speed**
  With print speeds up to 220 full-color or 1,000 monochrome cards per hour, the CD810 maximizes efficiency without lowering print quality.

- **3-year warranty with "hot swap" loaner coverage**
  In addition to your 3-year printer and printhead manufacturer warranty from Datacard, ID Zone provides three years of "hot swap" loaner printer coverage. In the unfortunate event that you will need your printer serviced, ID Zone will help reduce potential card issuance downtime by sending you a loaner printer, plus printer support from our knowledgeable ID Experts.

CloudBadging ID Card Software

- **Secure and powerful cloud-based software - FREE for 30 days!**
  CloudBadging is an industry-leading ID badge management software that provides a secure, cloud-based platform users can access from any internet connected device using their favorite web browser. This simple-to-use, powerful software increases productivity and efficiency across your organization by streamlining ID design, credentials issuance, and user records management. CloudBadging grants you instant access to your ID card program, in the office or on the go!

Color Ribbon and Cards

- **Print ID cards - *out of the box!***
  Start printing your ID cards right away when your CD810 dual-sided system arrives! In addition to the CD810 ID card ptinter, this complete system includes a 250-print YMCKT ribbon and a 500-pack of CR80 PVC standard-size cards to get you started.

Credential Cam Digital Photo ID Webcam

- **2.0 Megapixel Camera**
  Take professional-quality photos using the Credential Cam digital photo camera. This user-friendly, plug-and-play camera is designed to work with both PC and Mac operating systems.

Ideal Applications:

- Corporate
- K-12 Schools
- Colleges and Universities
- Healthcare
- Loyalty/Membership
